Education

Bachelor of Technology – Artificial Intelligence And Data Science 2023–2027
Rajasthan Institute of Engineering And Technology, Jaipur, India

Grade XII 2022–2023
National Institute of Open Schooling, Jaipur, India

Experience

NZESSENTIALS, Christchurch, NZ (Remote) Dec 2025–Feb 2026
Freelance Python Developer

- Engineered a web application using Python and Firebase to securely capture and store digital signatures.
- Developed a Python-based desktop application for efficient retrieval and verification of stored signatures.
- Integrated RESTful APIs to ensure seamless data exchange between the web and desktop applications.

Internship

IBM SkillsBuild July 2025 – August 2025
Agentic AI Intern

- Developed an Agentic AI healthcare prescription assistant using Python, Google Gemini, IBM Cloud, and Google Colab.
- Designed a Multi-Agent System for social media management, exploring agent collaboration and automated task execution.
- Applied concepts including Artificial Intelligence, AI Agents, Multi-Agent Systems, Lean Canvas, and GitHub-based development.
- Developed **MindEase**, an AI project applying agentic AI concepts to a practical use case.

Projects

Social-E-Motion 2024
Python, Next.js, REST APIs, Prisma — *GitHub*

- Extracted and analyzed unstructured text from Reddit API using NLP to identify user behavior patterns.
- Built a full-stack application with Next.js and RESTful APIs, integrating AI for content summarization.
- Achieved a 45% improvement in user behavior tagging accuracy and reduced data processing time by 30%, leading to faster personalization insights.

Nex.us – Resume Analyzer & Job-Matcher 2024
React, Node.js, AWS, RESTful APIs — *GitHub*

- Designed a full-stack application to parse resumes and match them with job descriptions using AWS.
- Developed a script to extract unstructured resume data, improving matching accuracy with JSON data.
- Increased job-resume matching accuracy by 60% over manual matching and cut recruiter screening time by 35%, significantly improving hiring efficiency.

Skills

- **Languages:** Python, SQL, NoSQL (MongoDB), HTML, CSS, Javascript, Typescript
- **Frameworks & Libraries:** React, Next.js, Node.js, Flask, Pandas, NumPy, AWS (EC2, S3)
- **Tools & Platforms:** Git, AWS, Firebase, Problem Solving, Analytics, Communication
- **Concepts / Certifications:** IBM SkillBuild Agentic AI, Data Structures, Vector Search, NLP, RAG, Data Modeling, Machine Learning, Artificial Intelligence

Achievements & Leadership

- Won 1st price in Intercollege Chess championship at RIET, Jaipur in 2023.
- Won 2nd price in Engineers day Quiz competition.
- Hosted ENIGMA - National Level Hackathon at RIET, Jaipur. I was part of the design and technical team.
